Population and Vital Statistics Report

Statistical Papers
Series A Vol. LXIV
Data available as of 1 January 2012

United Nations
New York, 2012

The Department of Economic and Social Affairs of the United Nations Secretariat is a vital interface between global policies in the economic, social and environmental spheres and national action. The Department works in three main interlinked areas: (i) it compiles, generates and analyses a wide range of economic, social and environmental data and information on which States Members of the United Nations draw to review common problems and to take stock of policy options; (ii) it facilitates the negotiations of Member States in many intergovernmental bodies on joint courses of action to address ongoing or emerging global challenges; and (iii) it advises interested Governments on the ways and means of translating policy frameworks developed in United Nations conferences and summits into programmes at the country level and, through technical assistance, helps build national capacities.

NOTE

The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations concerning the legal status of any country or territory or of its authorities, or concerning the delimitation of its frontiers or boundaries.

Where the designation "country or area" appears in the headings of tables, it covers countries, territories or areas.

Regular updates of the Population and Vital Statistics Reports are available at the United Nations Statistics Division website:

INTRODUCTION

This issue of the *Population and Vital Statistics Report* presents data for countries or areas[1] on population size (total, male, and female) from the latest available census, estimated total population size for 2009 or 2010 (the later available year), and the number and rate of vital events (live births, deaths, and infant deaths) for the latest available year within the past 15 years (1996-2010). These data are presented as reported by national statistical authorities to the *Demographic Yearbook* of the Statistics Division of the United Nations Department of Economic and Social Affairs.[2] This issue also presents data for the world and its major areas and regions[1] on estimated population size for both 2009 and 2010. These estimates were prepared by the Population Division of the United Nations Department of Economic and Social Affairs.[3] The data described in this paragraph are presented in three tables:

Table 1. Estimated mid-year population by major area and region, 2009 and 2010
Table 2. Population, latest available census and estimates for 2009 or 2010
Table 3. Live births, deaths, and infant deaths, latest available year within the past 15 years (1996-2010)

TECHNICAL NOTES

A. Population

Population estimates for 2009 and 2010 for the world and its major areas and regions (table 1) refer to 1 July of the given year, and are produced by the United Nations Population Division.[3]

Latest population census figures for countries or areas (table 2) refer to the given date, and are presented as reported by national statistical authorities to the *Demographic Yearbook* of the United Nations Statistics Division. The data are from nationwide population and housing censuses. These censuses use different methods of enumeration: conventional/traditional, based on administrative/population registers, or a combination of methods that may include a sample survey.[4] The censuses are conducted on either a *de facto* or a *de jure* basis, as indicated in the column "Code." The *de facto* population consists of all persons who are physically present in the country or area at the reference date, whether or not they are usual and/or legal residents. The *de jure* population consists of all usual residents, whether or not they are present at the time of the enumeration and/or legal. Population census data are presented for 236 countries or areas that conducted a census during the period 1960-2010.

Mid-year population estimates for 2009 or 2010 for countries or areas (table 2) refer to 1 July of the given year unless otherwise stated, and are presented as reported by national statistical authorities to the *Demographic Yearbook* of the United Nations Statistics Division. They are also coded as either *de jure* or *de facto*, since for some countries or areas the code is not the same as for the census figure.

B. Vital statistics

Table 3 presents data for countries or areas on live births, deaths, and infant deaths (excluding foetal deaths) for the latest available year within the last 15 years (1996-2010). The data usually refer to vital events that *occurred* in the specified year, even if some were registered later. In some countries or areas, however, they refer to events that were *registered* in the specified year, and, therefore, include some events that occurred previously, and exclude some events that occurred in the specified year but that were or will be registered later. In this case, the symbol "+" is displayed in the column "Code."

---

[1] In table 1 of this report "countries or areas" are grouped geographically into 21 "regions" (for example, Central America), which are then grouped into six "major areas" (for example, Latin America and the Caribbean). In tables 2 and 3 they are listed by six "continents" (for example, North America).

[2] Data on these and many other demographic statistics are maintained and continuously updated in the *Demographic Yearbook* database. A small selection of demographic statistics are published annually as the *Population and Vital Statistics Report*, and a much larger selection is published annually as the *Demographic Yearbook*, which also has complementary statistics and extensive technical notes. The *Demographic Yearbook* is also available online, at: http://unstats.un.org/unsd/demographic/products/dyb/default.htm.

[3] United Nations, Department of Economic and Social Affairs, Population Division (2011). *World Population Prospects: World Population Prospects: The 2010 Revision, CD-ROM Edition.* http://esa.un.org/unpd/wpp/

[4] If the census method of enumeration is not conventional/traditional, the type of method is indicated in a footnote to the census date in the table.

Most of the vital statistics data presented in table 3 come from national civil registration systems. These systems differ markedly in the completeness of the data that they produce. If the country or area reports to the *Demographic Yearbook* its own estimate of the completeness of its civil registration data, then this estimate is classified in the column "Code" as follows: "C" indicates virtually complete data (that is, representing 90 per cent or more of the events occurring in the specified year); and "U" indicates incomplete data (that is, less than 90 per cent of the events). Data not derived from civil registration - usually official estimates from censuses, sample surveys or demographic analyses - that are assumed reliable are indicated by "|".

The table shows both the number of vital events and the rates at which they occur. *Crude birth and death rates* are the number of live births and (total) deaths, respectively, per thousand persons in the same year. These rates are based on estimates of mid-year population as reported by national statistical authorities to the *Demographic Yearbook*. The *infant mortality rate* is the number of deaths of persons less than one year of age per thousand live births in the same year. Unless otherwise stated, the rates shown were computed by the United Nations Statistics Division. Rates were only computed when the numerator - the number of vital events - is at least 30 and when the denominator (mid-year population or the number of live births) is available for the same year. Furthermore, rates were computed only if the code for vital events (see the previous paragraph) is "C" or "|".

C. Symbols

The following symbols and notations are used:

...	Data or information not available/rates not computed
-	Magnitude zero
*	Provisional figure
+	Data tabulated by year of registration rather than occurrence
C	Civil registration, estimated 90 per cent or more complete
U	Civil registration, estimated less than 90 per cent complete
|	Source other than civil registration, estimated reliable
DF	Population de facto
DJ	Population de jure
SSDF	Sample survey, population de facto
SSDJ	Sample survey, population de jure

D. Highlights

1. Population censuses

One goal of this report is to present the most recent data for total, male, and female population collected by a national population census. In the majority of cases, national population censuses are carried out once every ten years, that is, every census round. A census round, as defined and implemented by the United Nations, encompasses ten years starting with the fifth year of a decade and ending in the fourth year of the next decade (for example, the 2010 census round started on 1 January 2005 and will end on 31 December 2014). Detailed information on planned or conducted national population censuses is collected by the United Nations Statistics Division and presented at the website mentioned below. http://unstats.un.org/unsd/demographic/sources/census/.

The latest available census figures for total population (for 1960-2010) are given in this publication for 236 countries or areas, whenever available disaggregated by sex. Of these figures, 110 (47 per cent) refer to the current 2010 census round (2005 – 2014), 112 (47 per cent) refer to the 2000 census round (1995-2004), 7 (3 per cent) refer to the 1990 census round (1985-1994), and 7 (3 per cent) refer to the 1980 or previous census rounds.

2. Vital statistics

The main source of vital statistics is civil registration. "Civil registration is the continuous, permanent, compulsory and universal recording of the occurrence and characteristics of events, including vital events, pertaining to the population, as provided by decree or regulation, in accordance with the legal requirements of a country."[5] The availability of detailed vital statistics for a country or area illustrates national capacity in the compilation of these statistics from civil registration systems.

[5] *Principles and Recommendations for a Vital Statistics System, Revision* 2, Sales No.E.01.XVII.10, United Nations, New York, 2001, para. 26.

This report aims to present the most recent data for the period 1996 – 2010 on live births, deaths, and infant deaths reported to the *United Nations Demographic Yearbook*.

Out of 236 countries or areas, the latest available figure for live births refers to year 2008 or later for 141 countries or areas (60 per cent); to year 2006 or 2007 for 36 countries or areas (15 per cent) and to an earlier year for 30 countries or areas (or 13 per cent). No data for live births are available for 29 countries or areas (or 12 per cent) for the period 1996 - 2010. The availability of data on (total) deaths is similar. However, data on infant deaths are somewhat less recent: 108 figures (or 46 per cent) refer to years 2008 or later, 30 (or 13 per cent) to 2006-2007, 41 (or 17 per cent) date from 2005 or earlier years and 57 countries or areas (or 24 per cent) did not report data on infant deaths for the period 1996-2010.

Italic Estimates that are less reliable

a "Code" indicates the source of data, as follows:

DF De facto

DJ De jure

SSDF Sample survey, de facto

SSDJ Sample survey, de jure

♦ Data refer to 2009

1 Data refer to national projections.

2 Excluding Mayotte.

3 Post-censal estimates based on 1999 Population Census.

4 Excludes the islands of St. Brandon and Agalega.

5 Based on 2000 Population Census data and adjusted for underenumeration of young children.

6 Based on the results of the 2004 Population Census.

7 The number of males and/or females excludes persons whose sex is not stated (18 urban, 19 rural).

8 Data refer to 1 January.

9 Data refer to 31 December.

10 Based on the results of a population count.

11 Data are based on projections from 2002 Census.

12 Data have not been adjusted for underenumeration, estimated at 2.4 per cent.

13 Mid-year estimates have been adjusted for underenumeration at latest census.

14 Comprising the Northern Region (former Saguia el Hamra) and Southern Region (former Rio de Oro).

15 Excluding persons who were not contacted at the time of the census.

16 Excluding the institutional population.

17 Because of rounding, totals are not in all cases the sum of the parts.

18 Estimates adjusted for census net undercoverage (including adjustment for incompletely enumerated Indian reserves).

19 Preliminary postcensal estimates.

20 Excluding residents of institutions.

21 Based on 2010 National Household Survey.

22 Population in households only.

23 Estimates based on 2007 Population Census.

24 Population statistics are compiled from registers.

25 Excluding data for Saint Barthélémy and Saint Martin.

26 Projections based on 2002 Population Census.

27 Projections produced by l'Institut Haïtien de Statistique et d'Informatique (IHSI) and the Latin American and Caribbean Demographic Centre (CELADE) - Population Division of ECLAC.

28 Data are based on projections of the 2001 Population and Housing Census data.

29 Total represents population in private dwellings, the non-institutional population and persons found on the streets between the hours of 5am and 7am on September 26, 2001; the figures represent the census counts adjusted for under-coverage.

30 Including an estimation of 1 334 585 persons corresponding to 448 195 housing units without information of the occupants.

31 Includes estimates for St. Eustatius.

32 Data refer to projections based on the 2000 Population Census.

33 Including armed forces stationed in the area.

34 Based on the results of the 2000 Population Census.

35 Excluding armed forces overseas and civilian citizens absent from country for an extended period of time.

36 Data based on 2010 Population Census.

37 Data include persons in remote areas, military personnel outside the country, merchant seamen at sea, civilian seasonal workers outside the country, and other civilians outside the country, and exclude nomads, foreign military, civilian aliens temporarily in the country, transients on ships and Indian jungle population.

38 Data based on the Population Census of 2005.

39 Excluding nomadic Indian tribes.

40 Include 477 persons present in the Falkland Islands in connection with the military garrison, but exclude all military personnel and their families.

41 A dispute exists between the governments of Argentina and the United Kingdom of Great Britain and Northern Ireland concerning sovereignty over the Falkland Islands (Malvinas).

42 The previous census was conducted only 16 months earlier (on 31 Mar 2003) but it was repeated because all of its data were destroyed in a fire before they could be fully processed, analyzed, and reported.

43 Figures for male and female population do not add up to the figure for total population, because they exclude 365 persons of unknown sex.

44 Data refer to resident population in Uruguay according to Census Phase 1, carried out between the months of June and July 2004.

45 Excluding Indian jungle population.

46 Excluding nomad population.

47 The adjusted total population of the country is 26 million (13.3 million males and 12.7 million females).

48 Data refer to the settled population based on the 1979 Population Census and the latest household prelisting. The refugees of Afghanistan in Iran, Pakistan, and an estimated 1.5 million nomads, are not included.

49 The methodology used for calculating the number of the de facto and de jure population in the 2001 census data differs as follows from the methodology used in previous censuses: the duration that defines a person as being ' temporary present ' or 'temporary absent' is now 'under one year'. The previously applied definition was for '6 months'.

50 Data have not been adjusted for underenumeration, estimated at 4.96 per cent.

51 Data refer to projections based on the 2005 Population Census.

52 Excluding foreign diplomatic personnel and their dependants.

53 Data refer to national projections based on 2008 Census.

54 For statistical purposes, the data for China do not include those for the Hong Kong Special Administrative Region (Hong Kong SAR), Macao Special Administrative Region (Macao SAR) and Taiwan province of China.

55 Data have been estimated on the basis of the annual National Sample Survey on Population Changes.

56 Data refer to government controlled areas.

57 Including all persons irrespective of citizenship, who at the time of the census resided in the country or intended to reside for a period of at least one year. It does not distinguish between those present or absent at the time of census.

58 Including data for the Indian-held part of Jammu and Kashmir, the final status of which has not yet been determined.

59 Including unknown sex.

60 Final intercensal estimates.

61 Data refer to the Iranian Year which begins on 21 March and ends on 20 March of the following year.

62 Excluding the population in three autonomous provinces in the north of the country.

63 Including data for East Jerusalem and Israeli residents in certain other territories under occupation by Israeli military forces since June 1967.

64 Data are rounded for confidentiality reasons.

65 Excluding diplomatic personnel outside the country and foreign military and civilian personnel and their dependants stationed in the area.

66 Excluding data for Jordanian territory under occupation since June 1967 by Israeli military forces. Including registered Palestinian refugees and Jordanians abroad.

67 Excluding data for Jordanian territory under occupation since June 1967 by Israeli military forces. Excluding foreigners, including registered Palestinian refugees.

68 Based on the results of the 2005 Population and Housing Census.

69 Based on the results of a household survey.

70 Data refer to 30 June.

71 Data including estimated population from household listing from Village Development Committees and Wards which could not be enumerated at the time of census.

72 Data have been adjusted for underenumeration, estimated at 2.70 per cent.

73 Excluding data for the Pakistan-held part of Jammu and Kashmir, the final status of which has not yet been determined.

74 Data are based on projections of the 2000 Population and Housing Census data.

75 Excluding usual residents not in country at time of census.

76 The Population and Housing Census 2001 did not cover the whole area of the country due to the security problems; data refer to the 18 districts for which the census was completed only (in three districts it was not possible to conduct the census at all and in four districts it was partially conducted).

77 Including Palestinian refugees.

78 All persons falling within the scope of the census were enumerated on a de jure basis, except students who were enumerated on a de facto basis.

79 Data based on Address Based Population Registration System.

80 Statistics are compiled from registers.

81 Average annual population based on the final data of 2009 Population Census.
82 Excluding Faeroe Islands and Greenland shown separately, if available.
83 Excluding Åland Islands.
84 Excluding diplomatic personnel outside the country and including members of alien armed forces not living in military camps and foreign diplomatic personnel not living in embassies or consulates.
85 Data of the microcensus - a 1% household sample survey - refer to a single reference week in spring (usually last week in April).
86 Excluding homeless persons.
87 Excluding foreign military personnel and foreign diplomatic and consular personnel and their family members in the country.
88 Excluding families of military personnel, visitors and transients.
89 Excluding military personnel, visitors and transients.
90 Including armed forces stationed outside the country and alien armed forces in the area.
91 Excluding armed forces stationed outside the country, but including alien armed forces stationed in the area.
92 Data refer to 31 March.
93 Data refer to the Vatican City State.
94 Data refer to 30 April.
95 Including civilian nationals temporarily outside the country.
96 Figures for male and female population do not add up to the figure for total population, because they exclude 119 persons of unknown sex.
97 Census results based on compilation of continuous accounting and sample surveys.
98 Excluding Svalbard and Jan Mayen Islands shown separately, if available.
99 Including residents temporarily outside the country.
100 Excluding civilian aliens within country, but including civilian nationals temporarily outside country.
101 Excluding Transnistria and the municipality of Bender.
102 Excluding data for Kosovo and Metohia.
103 Excluding transients visitors.
104 Inhabited only during the winter season. Census data are for total population while estimates refer to Norwegian population only. Included also in the de jure population of Norway.
105 Excluding Channel Islands (Guernsey and Jersey) and Isle of Man, shown separately, if available.
106 Counts for the 2001 Census are taken from 'Key Statistics table 1 for the Urban/Rural classification: England and Wales' available on CD based on the usually resident population.
107 This data has been randomly rounded to protect confidentiality. Individual figures may not add up to totals, and values for the same data may vary in different tables.
108 Including population in off-shore, migratory and shipping.
109 Intercensal estimates.
110 Data are based on 2009 Australian Standard Geographical Classification boundaries.
111 Excluding Niue, shown separately, which is part of Cook Islands, but because of remoteness is administered separately.
112 Based on the census, updated for residents missed or counted more than once by the census (net census undercount); residents temporarily overseas on census night, and births, deaths and net migration between the census night and the date of the estimate.

NOTES

... Data not available

- Magnitude zero

* Provisional

italic Data from civil registers that are incomplete or of unknown completeness

a "Code" indicates the source of data, as follows:

C Civil registration, estimated at least 90% complete

U Civil registration, estimated less than 90% complete

| Other source, estimated reliable

+ Events are counted when registered, not when they occurred.

... Information not available

1 Excluding live-born infants who died before their birth was registered.

2 Data refer to Algerian population only.

3 Based on the results of the Population Census.

4 Data refer to national projections.

5 Data from Health Statistics Reports since 1998, due to incompleteness of civil registration.

6 Data refer to the twelve months preceding the census in December.

7 Data from civil registration centres of Brazzaville, Pointe-Noire, Dolisie, Nkayi, Mossendjo and Ouesso communes.

8 Data refer to the twelve months preceding the census in May.

9 Excluding data for November and December.

10 Coverage of live births is below 60%.
